Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, Claims 1-24, 48-57 and 61-65, drawn to Method of Making of a Semiconductor IC, classified in class 438, subclass 279.

Group II, Claims 25-47 and 58-60, drawn to Semiconductor Device , classified in class 257, subclass 509+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, prior forming the source drain, the gate layer can be formed and patterned and the source drain can be formed using the patterned gate layer as a mask in order to manufacture the device of Group II.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
